

THREE-LAYER EDGE-GLUED PANELS

The three-layer edge-glued panel is an inherently rigid solid wood material with numerous benefits. It offers easy processing into furniture doors for e.g. kitchens, bathrooms, and wardrobes. Three-layer panels are also the perfect material for tabletops and shelving units.

Three-layer edge-glued panels are made for stock in sizes that are tailored to match the wishes and requirements of the sector facilitating agile deliveries in both small and large quantities. For non-standard formats, the panels can also be made to order, including in more than three layers.

Available in: Oak, Birch, and Ash.

PRODUCT LEAFLET THREE-LAYER EDGE-GLUED PANELS

Orders are e-mailed to order@kglint.se
